### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendment and remarks filed August 12, 2004 has been carefully considered and found persuasive. As stated in the remarks on page 8, line 12 through page 9, line 12, the web tension control system disclosed in the Mehofer reference (US 3,912,145) comprising a pair of roller (10 & 18) forming a nip upstream of the dancer assembly driven by a drive torque or a holdback torque (62 & 64) for repositioning the dancer assembly (12) which are different from the apparatus recited in the amended independent claims 16 and 40 of the present application. Claims 16 and 40 as amended are allowed over the prior art because the nip formed by the first and second rollers (62 & 64) is located downstream of the dancer comprising a vertically reciprocating roller (60) and upstream of the joining station so that the torque control device applying an output torque having sufficient magnitude to the first roller in order to produce a desire tension in the portion of the web between the nip and the joining station.

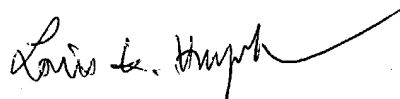

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
